

25/2/2018

MASTER DEGREE OF ANAESTHESIA / FEBRUARY 2018

All questions must be answered

1. Causes and diagnosis of liver cell failure (15 marks)
2. Acute complications of diabetes (15 marks)
3. Describe curable hypertension (15 marks)

MCQs (45 marks)

1-Cirrhosis can be caused by except:

- A. Hepatitis A virus
- B. Hepatitis B virus
- C. Hepatitis C virus
- D. Hemochromatosis

2-All of the following may cause elevation of serum troponin except

- A. Congestive heart failure
- B. Myocarditis
- C. Myocardial infarction
- D. Pneumonia

3-Upper gastrointestinal tract bleeding is up to?

- A. Pylorus
- B. Ampulla of Vater
- C. Ligament of Treitz
- D. End of jejunum

4-The recommended criteria to diagnose Diabetes Mellitus is :

- A. Random glucose above 180 mg/dl
- B. Fasting glucose equal 126 mg/dl or above
- C. HbA1c above 5.8%
- D. 2 hours glucose tolerance test with glucose value 140-199 mg/dl

5-The clinical features of primary hypothyroidism include all the following except:

- A. Insomina
- B. Bradycardia
- C. Puffy eyelids
- D. Constipation

6-All of the following are suggestive of iron deficiency anaemia except

- A. Koilonychias
- B. Decrease serum ferritin
- C. Decrease total iron binding capacity
- D. Low reticulocytic response

7-All of the following produce systemic hypertension except

- A. Polycystic kidney
- B. Pheochromocytoma
- C. Addison's disease
- D. Conn's syndrome

8-Hypersplenism is characterized by the following except:

- A. Splenomegaly
- B. Pancytopenia
- C. Corrected by splenectomy
- D. Hypocellular bone marrow

9-the causes of polyuria are the following except

- A. Diabetes Mellitus
- B. Diabetes insipidus
- C. Chronic renal failure
- D. Hypocalcemia

10-Aortic stenosis may cause all excep:

- A. Small pulse
- B. Syncope
- C. Hyperkinetic apex
- D. Angina

11-One of the following is incorrect about hypokalemia

- A. Skeletal muscle weakness
- B. Paralytic ileus
- C. Tall peaked T wave
- D. High U wave

12-Stony dullness percussion of the chest occurs in:

- A. Pulmonary consolidation
- B. Pulmonary collapse
- C. Pulmonary fibrosis
- D. Pleural effusion

13-Which of the following is a type of restrictive lung disease?

- A. Parenchymal lung diseases
- B. Abnormalities of chest wall and pleura
- C. Neuromuscular disease
- D. All of the above

14-Morning stiffness occurs mainly in:

- A. Gout
- B. Rheumatoid arthritis
- C. Rheumatic arthritis
- D. None of the above

15-Complications of chronic renal failure include all of the following except:

- A. Anemia
- B. Mineral bone disorders
- C. Pericarditis
- D. Metabolic alkalosis

GOOD LUCK
